WORK EXPERIENCE

Hiringhood (SDE & AI/ML Intern) MARCH 2025 - SEPTEMBER 2025

As a Software Engineer Intern at Hiringhood, I worked on full-stack development using React, TypeScript, Redux, Node.js, and MongoDB, along with AWS and the Serverless framework for cloud deployment. I also took on the AI/ML role, managing both responsibilities with production-level tasks, some of which are already live in production.

SOFTWARE SKILLS

Programming & Scripting Languages: Python, C, JavaScript, TypeScript, MySQL, PostgreSQL, HTML, CSS.
Frontend Development: React.js, Next.js, Tailwind CSS, Material UI, Redux, Webpack.
Backend Development: Node.js, Express.js, REST API, GraphQL, Firebase, Redis, JWT, OAuth.
Databases: MongoDB, PostgreSQL, MySQL, Redis.
Cloud Services & DevOps: AWS (Lambda, EC2, S3), Docker, CI/CD.
Software & Tools: Git, Jupyter Notebook, Microsoft Office, Anaconda, Tableau, Figma.
Machine Learning & Data Science: Linear Regression, Logistic Regression, Decision Trees, Classification, Random Forests, Naïve Bayes, CNN, PySpark, NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn, Seaborn, TensorFlow.

PROJECTS

Mini Researcher – AI powered research automation tool for data extraction and NLP based query analysis using Gemini API.
JD & CV Match Score – ML driven Flask application that scores job–resume alignment using NLP and LLMs.
Doc Query Chat – RAG-based document Q&A system with semantic search using LangChain and vector databases.
CV Redactor – FastAPI based AI service that detects and redacts sensitive resume data using NLP.
AI Mock Tests – AI driven testing platform that generates adaptive assessments and automated scoring.
Talk to Resume – Conversational AI tool for extracting skills and insights from resumes via NLP.
Recruiter Co-Pilot – AI powered recruitment assistant for resume screening and intelligent candidate shortlisting.
